Professional Workshop – Working with Silver

Goldsmith, Jade Hibbert, is a UK jewelry designer whose work has featured in GLAMOUR magazine and debuted in London stores. What once started as an interest, Jade has persevered a career in jewelry production and built her contemporary brand JWLLRYBYJADE. Her minimal contemporary designs have helped Jade showcase at various trade shows and been her motivation to create one of a kind pieces.

You will observe and work alongside Jade to produce a ring made from silver. You will be expected to record all working methods within your sketchbooks along with your final outcome. You will also be asked to document notes for your professional practice files, recording information regarding promoting/marketing work, project management skills and ethical/environmental considerations.

INTERNATIONAL DESIGN COMPETITION

Andreu World works to create sustainable and innovative designs, providing durable furniture solutions that allow to enjoy the spaces that people utilize in a smart and healthy way. Subject

Design for a chair and/or table.

Conditions

Seating: The main material used shall be Beech wood, Oak wood or Walnut. Chairs may be upholstered to a greater or lesser extent, if considered appropriate and veneered board or plywood.

Tables: The main material used shall be Beech wood, Oak wood or Walnut. Tables may be veneered board or plywood.

The use of other materials such as metals, plastics, glass, etc. is allowed when complementary, structural or incidental to the above. All designs presented shall be new, not having been marketed or disclosed prior to the date of the Contest.

Specifications

Possible innovative features related to design, quality, technology, production processes, etc. and in general anything that adds value to the presented project.

Possible adaptation to the product philosophy of Andreu World, S.A.

Production costs and/or recovery.

Functionality: fulfilment of the functions for which it has been designed.

All-round simple and viable mass production possibilities.

Possible versatility and suitability for development in occasional pieces such as stools, easy chairs, sofas, etc. in the case of chairs, and of different sizes and heights in the case of tables.

Suitability to numerous ambiances and uses such as the home, contract work, etc.

The presentation of a creative video explaining the project and/or showing the details and model of the design will be evaluated.

Talented HNC/D 3D Design students from Bedford College took part for the first time in an international event, New Designers in 2016. Their work was seen alongside the most famous design universities in the UK. **We have been invited back to take part in the 2018 show.**

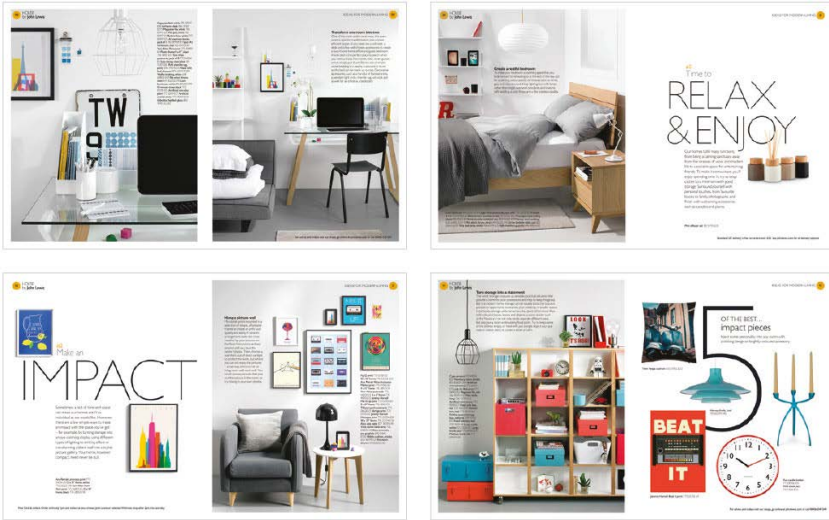

Testimonials

There is nowhere else quite like New Designers where you can come into one remarkable space and see the pick of the crop of the next generation of designers. Emerging design is not an add-on, it's not an added extra, it's essential if Britain is going to have a creative future. It's always that every generation comes up with new thinking and new talent, it's ready to challenge people, it's ready to say we can do this if you give us a chance. Find them at New Designers.

Deyan Sudjic, Director, Design Museum

Aim of visit –

To gain understanding of product photography shoots /editing and how this area of the industry functions.

Planning the visit – Schedule, route and costings.

Bedford to St Pancras

St Pancras – Piccadilly Line (Tube)

Tube - Piccadilly Line – Park Royal

Park Royal - Content Production, Unit 4 Origin Business Park, Rainsford Road, NW10 7FW (15 min walk)

Proposed questions -

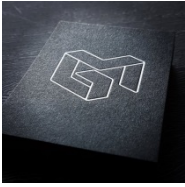

How much planning do you do beforehand?

Do you collaborate with other marketing agencies? Or is it all in house?

How did individuals get into the industry?

How far ahead do they work?

.....

Up and coming - Workshop with Professional Designer

HOT NEW DESIGNER

WHO... Gianluca Mingolla, furniture designer

NEED TO KNOW... An entrant to last year's One Year On, an annual showcase of makers in their first year of business that's part of the New Designers event, British designer Gianluca Mingolla is one to watch.

After studying 3D Design at Manchester University, he blended traditional skills with CNC and laser technologies to create 'London by Night' - a table made from machined hardwoods with a laser-etched top inspired by nocturnal satellite maps. Since then, he's exhibited as part of Design Event MART at Northern Design Festival, a curated selling exhibition presenting the best in contemporary design.

FOR STOCKIST INFORMATION SEE PAGE 159

INSPIRATION... "My inspiration comes from setting myself the task of pinpointing the necessity of skilled craftsmanship within today's digital era," he says. "design and make furniture that celebrates traditional skills complemented by CNC and laser work. My considered use of machined hardwoods, attention to detail and laser-etched surfaces come together beautifully in pieces."

LOOK OUT FOR... His next table 'The Sound of Technology'. Gianluca records the sound of his work and uses the waves to create an image on the surface of the piece. About to be batch produced, it will be available from the showroom at Ferrius in Manchester. ☺

Find out more about Gianluca's work at gianlucamingolla.com

The Sound of Technology table, £1400. London by Night table, £620. H62xW45x D38cm, £945

Material workshop with Gianluca Mingolla (Professional practice)

You will have the opportunity to take part in a one day workshop where you will be guided by a professional designer in the process of wood techniques.

Up and coming – Resin and Mould Making Workshop with Arthur Mansell from Notcutt.
